Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(application filed on or after May 29, 2000)

The patent term adjustment to date is 49 days. If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the term adjustment will be 49 days.

If a continued prosecution application (CPA) was filed in the above-identified application, the filing date that determines patent term adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system. (<http://pair.uspto.gov>)

Any questions regarding the patent term extension or adjustment determination should be directed to the Office of Patent Legal Administration at (703)305-1383.

Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to an imaging apparatus for transmitting wavefield energy into a tissue appendage of a body, classified in class 378, subclass 62.
 - II. Claims 18-30, drawn to a breast imaging apparatus wherein the breast surface is irradiated with wavefield energy, classified in class 378, subclass 37.
 - III. Claims 31-35, drawn to a method for producing an image of an object in a region from wavefield energy that has been transmitted into and scattered by the object, wherein the image comprises a map of selected physical characteristics, classified in class 378, subclass 901.

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the imaging apparatus can be used to study any tissue in an appendage of the body, it is not limited to the breast. For

Art Unit: 3737

example, the prostate may be studied. The subcombination has separate utility such as a breast imaging apparatus.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions III and I and II are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus in inventions I and II can be used to practice another process, it does not have to follow the exact steps outlined in the method of invention III (See U.S. Patent No. 6,005,916).

4. Because these inventions are distinct for the reasons given above and the search required for Groups I and II is not required for Group III, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. During a telephone conversation with Bradley DeSandro on April 1, 2003 a provisional election was made without traverse to prosecute the invention III, claims 31-35. Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-30 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

REASONS FOR ALLOWANCE

7. Claims 31-35 are allowed.

8. The following is an examiner's statement of reasons for allowance:

Johnson et al. U.S. Patent No. 6,005,916 teaches a method for producing an image of an object in a region from wavefield energy that has been transmitted into and scattered by the object, said image comprising a map of selected physical characteristics at selected points within the region performing a convergence step comprising the following steps: (1) preparing, for each one or more frequencies at each transmitter transducer positions and respective orientations thereof, an estimate of a

Art Unit: 3737

total wavefield energy at selected points derived from a selected incident wavefield energy for selected points stored in the computer memory and region characteristics estimate for selected points by the steps of: (i) designating a primary set of surfaces of a plurality of selected surfaces and a different secondary set of surfaces of said selected surfaces, each said selected surface intersecting said region.

Johnson et al. U.S. Patent No. 5,588,032 teaches an apparatus and method for rapid real time imaging with wavefield energy by inverse scattering using a CPU programmed to process data derived from wavefield energy that has been transmitted and scattered by an object so as to reconstruct a wavefield image of the object. The images are 50 by 50 pixels, each pixel being $1/4$ wavelength square, and were reconstructed from frequencies in the range from $f_{\text{sub.max}}$ to $f_{\text{sub.max}}/50$.

Johnson U.S. Patent No. 4,662,222 teaches an apparatus and method for reconstructing an acoustic image of an object using a central processing unit programmed to process data derived from acoustic energy that has been transmitted at multiple frequencies and scattered by the object. Electronic signals are propagated at multiple frequencies and transduced into acoustic energy waves which are propagated toward an object.

None of the prior art, alone or in combination teaches or suggests a method for producing an image of an object in a region from wavefield energy that has been transmitted into and scattered by the object, said image comprising a map of selected physical characteristics at selected points within the region, and said method comprising performing a convergence step comprising the following step of designating a primary

Art Unit: 3737

subset of the selected wavefield points and a different secondary subset of the selected wavefield point, each of the selected wavefield point in the primary and secondary subsets of the selected wavefield points being separated from any other by at least one half of a minimum wavelength, wherein the minimum wavelength is the wavelength of the wavefield energy in the region at the maximum of one or more frequencies.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

9. This application is in condition for allowance except for the presence of claims 1-30 to an invention non-elected without traverse. Accordingly, **claims 1-30 have been cancelled.**

10. The application has been amended as follows:

In the abstract, line 1, delete "This invention describes." Start paragraph with -- A method... --.

Art Unit: 3737

EXAMINER'S COMMENTS

Drawings

11. The application having been allowed, formal drawings are required in response to this Office Action.

12. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
